
Introduction to Go

getting started with #golang

Stephan Peijnik-Steinwender, Head of Research & Development

— OUTLINE —

- — **What is Go?**
- — **A tiny bit of history**
- — **Quickstart**
- — **Go by example**

—
GO
—

What is Go?

- General purpose
- Compiled
- Statically typed
- Concurrent
- Simple
- Productive

A tiny bit of history

- Google 2007 (Griesemer, Pike, Thompson)
- Open Source November 2009
- 1.0 released in March 2012
- 1.13.1 released 2019-09-25

— QUICKSTART —

Go

- Text editor
- <https://golang.org/doc/install>

Go: A Tour of Go

- More information
- In-depth guide
- Interactive
- <https://tour.golang.org>

—

GO BY EXAMPLE

—

Code at GitHub

- <https://github.com/anexia-it/golang-intro19>
- Steps are tagged
- Feedback please!

HOMEWORK

- Add an additional format to the converter API
- Open a pull request on Github
- First PR containing **working** additional format implementation gets Anexia arcade machine
- Be creative!
